**DO I NEED LIFE INSURANCE?**

If you have family, or someone who depends on you financially, the answer is probably 'yes.' Life insurance helps protect your loved ones, no matter what. Whether the money is used to replace your income, cover funeral expenses, pay off debt, or provide for educational expenses, life insurance gives your family financial security when they need it most. Having the right life insurance is essential to planning for your present and future. Not only can it provide financial protection for your family after you are gone, many life insurance options offer other benefits and investment opportunities you can take advantage of while you are living.
